

VOLVO S90

INNOVATION FOR PEOPLE.

Made by Sweden.

At Volvo Cars, we continuously innovate in order to make your life better. Every car, every technology and every design is the result of a clear vision – to put people at the heart of everything we do. It's a vision that has driven us from the start, one informed by Sweden, a country which values people as individuals and where conventions are challenged. It's a culture with a rich design heritage and a unique way of looking at the world.

This vision has inspired us to create the likes of the three-point safety belt and side-impact airbags – inventions that have saved lives and changed automotive history. And with our new generation of cars we continue with

this tradition. Scandinavian design combines with modern Swedish luxury to enrich your experience. Intuitive Sensus technology makes life less complicated and keeps you connected with the world. And our IntelliSafe innovations support you while you are driving, helping to prevent accidents. They make your journey more comfortable and enjoyable.

We understand what's important to people. It forms the basis of all the innovations which we create. Innovations that improve lives.

At Volvo Cars we design our cars around you.

When we designed our new executive sedan we had a single aim: to create a car that would redefine the idea of luxury. The result is the new Volvo S90, a car that blends the best of Scandinavian design with advanced technology to give you a new experience, beyond the common place and everyday. A new kind of luxury. Swedish luxury.

The powerful, low-slung body, with the classic Volvo hallmark of a wide and muscular shoulder line, expresses the car's intent. It's confident and assured, the embodiment of a design philosophy that extends inside the car, where you'll discover a cabin crafted from exceptional materials.

"Underneath the crisply sculpted exterior lies a new chassis that delivers the perfect combination of precise handling and welcome comfort."

THE ART OF CREATION.

Where elegance complements technology.

From any angle the S90 looks elegant and powerful. The short overhangs, long wheelbase and low roofline combine to create a solid, sculpted whole that is sophisticated and elegant. The muscular shoulder line is distinctly Volvo, anchoring the car to its heritage while connecting it to the future.

The S90 is packed with innovative technology that has one purpose: to make your life easier, and one principle: it must be easy to use. A big touch screen means

we've been able to reduce the number of buttons to a minimum, and as it's in portrait format, reading and scrolling maps is much easier. Run-off Road Mitigation is a world-first innovation that helps to steer you back on track if the car starts to veer off the road accidentally. This is our human-centric approach to technology – it works for you.

Underneath the crisply sculpted exterior lies an all-new chassis that delivers the perfect combination of precise handling and

welcome comfort. New double wishbone front suspension and integral axle rear suspension give you control over the car's movement. The rear air suspension with active chassis has different settings to suit your mood, or the road, and keeps the car at the optimum level, regardless of load.

Elegance, craftsmanship and technology. This is what the S90 is made of.

Classically Volvo, distinctly modern.

Combining powerful proportions with Scandinavian subtlety elevates the S90 beyond the everyday. The long bonnet and low roofline suggest power and grace, while the sculpted shoulder line identifies the S90 as a Volvo.

Small details make a big impact.

Fine detailing and bold shapes combine to create a strong impression. Integrated tailpipes add to the design's coherence, while the shape of the LED rear lights gives the S90 real presence, whether moving or stationary.

DESIGNED FOR CONTROL.

Precision and accuracy at every touch.

From the moment you settle into the sculpted driver's seat you're in control. You sit low in the S90, with the 9-inch centre display with touch screen angled towards you to create the feeling of a cockpit. You're surrounded by an environment where beautiful materials and advanced technology meet, creating a cabin that looks great and works perfectly.

The exceptional craftsmanship enhances the feeling of precision. Take the air vents, inspired by our concept cars. With a metal-finish vertical strip and distinctive diamond-pattern surfaces for the control knobs they are beautiful to look at and a pleasure to use. In the S90 every component moves with the accuracy afforded by fine engineering. It is a

car that gives you control over every part of your journey.

Welcome aboard. This is the new first class: calm, comfortable and beautifully made. A place where the journey is as important as the arrival.

"In the S90, technology and convenience go hand in hand."

Experience a new way to travel.

Travel first class in every seat, every day. Because when you're in the S90 you're in your own private lounge, a place where comfort and luxury combine with technology and craftsmanship.

It starts with the front seats. Sculpted to complement the human form, they provide superb support and a huge range of adjustment, so everyone can find the ideal seating position. The shape of the backrests increases legroom for passengers in the rear, which means everyone benefits from the same level of comfort.

At night the cabin glows with the warmth of its interior lighting, welcoming you into the car. The high-level illumination package includes backlit door handles and illuminated tread plates, as well as additional interior lighting that enhances the exclusive ambience.

CleanZone technology means the air you breathe inside the car is cleaner than the air outside. It filters dust, pollen, particulates and odours while monitoring the air quality and closing the intakes if pollutant levels rise too high. It happens automatically – all you need to do is set the temperature you want and the S90 does the rest.

Four-zone climate control allows rear seat passengers to choose their own settings using a dedicated touch screen. It also includes an air-conditioned glovebox that keeps its contents cool, so warm days do not have to mean warm drinks.

You'll appreciate the details that make your life easier and more pleasant. The power operated boot lid has a hands-free function so you don't have to put down what you're carrying to open it. In the S90, technology and convenience go hand in hand.

In the driver's seat you're in charge with control functions such as navigation and entertainment from the steering wheel buttons, while the 12-inch driver display keeps you informed.

Every element of the cabin is crafted to make form and function one. The door handles can be backlit, making them easier to find in the dark.

Beautiful, natural materials such as Linear Walnut complement the car's advanced technology, creating a uniquely contemporary look.

*"Sensus connects you with
your Volvo and the rest of the world."*

SENSUS

Informed, in control and always up to date.

Sensus has a guiding principle – to make your life easier and more enjoyable, whether it's your comfort, entertainment or navigation requirements. Sensus connects you with your Volvo and the rest of the world. It keeps you informed, entertained and in control of your journey.

Intuitive, easy-to-use controls are a prime feature of Sensus and you will find them on the large, 9-inch centre display with touch screen. Replacing physical buttons with virtual equivalents on the screen allows them to be larger and easier to use. Bold, clear graphics make it easy to absorb information

at a glance. Our philosophy has always been that you should be able to operate your Volvo and keep your eyes on the road. The head-up display means you can do just that while staying connected and informed.

The Sensus experience enriches every moment that you spend in your Volvo.

"Turn the centre display into an extension of your iPhone® using Apple CarPlay™."

Connecting you with a world of entertainment.

Get closer to the music you love, no matter which seat you're in. With Sensus Connect all of your music is available all of the time, whether it's direct from your favoured media source or streaming from the internet.

It all begins with the 9-inch centre display, the control centre for Sensus. The surface responds to the lightest of touches – you only need to brush your fingers over the glass to operate the controls. It even works with gloved hands.

Connecting your devices to the S90 is

quick and easy. Simply plug your iPhone® into the car using the USB connection and you can turn the centre display into an extension of your iPhone® using Apple CarPlay™.

Your choice of entertainment is not limited by what you have on your smartphone or portable audio player. Our high performance audio system is tuned to make the most of your music, while Premium Sound by Bowers & Wilkins takes the listening experience to another level.

Premium Sound by Bowers & Wilkins gives every occupant of the S90 a superb audio experience, no matter which seat they are sitting in. Developed with Bowers & Wilkins, creators of high-end audio, this innovative technology brings exceptional clarity and realism to your favourite music. The unique air-ventilated subwoofer delivers richer, deeper bass by drawing air in from outside the car so it can pulse more air through the speaker. There

are 19 speakers, allowing everyone in the car to get the best possible sound, all the time. And you get closer to the performance by using one of the system's three room modes to bring the music to life. Concert mode recreates the unique acoustic experience of the Gothenburg Concert Hall, while Stage and Studio modes put you at the heart of the music, allowing you to hear it as the musicians intended.

SENSUS

9-inch centre display. The focal point of the elegant cabin is the 9-inch centre display with touch screen, which uses a portrait format to give you a large viewable area that means less scrolling. This format is perfectly suited to displaying maps, and mirrors the look of modern smartphones in its layout, so it feels instantly familiar and intuitive. It features a glossy black finish that, thanks to a special coating, minimises reflection – so it not only looks beautiful but works beautifully. This is how technology should be.

SENSUS

Get to your destination every time, with ease.

Let Sensus Navigation be your guide, helping you find your destination and keeping you informed. Our sophisticated navigation uses intuitive technology so that wherever you go, you'll get there quickly and easily.

Everything you need to know is shown on the 12-inch driver display right in front of you. The high-resolution image self-adjusts so it's never too bright, automatically resizing the instruments to accommodate navigation

information. The head-up display displays all the vital information onto the lower part of the windscreen, projected to look like it is hovering in front of the car. It means you stay informed without ever having to take your eyes off the road.

Getting to your destination is made even easier with the clear graphics of our maps.

With Sensus taking care of the way ahead, you can enjoy the journey.

Voice control. Controlling Sensus is as easy as telling it what to do. Talk to your Volvo, using natural phrases such as "go to Industrigatan, Göteborg" or "call Emily Johansson", and voice control will carry out your instructions to operate climate control, navigation, infotainment and your smart phone.

Centre display. The portrait format centre display with touch screen makes reading maps and following navigation prompts beautifully straightforward. Maps appear as they would in an atlas and they scroll less, so you can see where you're going and what's coming next. Its clarity, size and orientation make it the ideal companion for every journey.

INTELLISAFE

Protecting what's most important.

Protecting you and your passengers has always been our priority at Volvo Cars, and our latest generation of cars does more than ever to keep you safe. From preventive technology that helps you avoid collisions to protective features that cushion the impact of any collision, we will never stop innovating in order to improve your safety.

Your Volvo surrounds you with protective safety. The foundation for our new generation of cars is a very strong passenger compartment that uses a high percentage of

ultra high-strength (boron) steel to create a protective cage around you and your passengers.

Volvo Cars gave the world the three-point safety belt in 1959 and our latest developments continue this commitment to life-saving inventions. Run-off Road Mitigation is an emergency system which intervenes with steering inputs, braking if it detects you are about to come off the road.

Should your car leave the road, Run-off Road Protection technology reduces your

chances of suffering serious injury. Prepared front safety belts automatically tighten when the car senses that an impact is imminent, ensuring that you and your passenger are in the safest position if a collision occurs. Our unique energy-absorbing seats also help to protect your spine in the event of a hard landing should the car become airborne.

It's this range of safety technologies and attention to detail that makes your Volvo a safe place to be.

Volvo is synonymous with road safety. We put our first safety cage into production in 1944, and created the three-point safety belt back in 1959. And we're still innovating today. Prepared front safety belts tighten automatically if the car detects that a collision is likely, to ensure you're in the safest position should one occur.

The sculpted front seats in the S90 are more than just beautiful to look at. Their unique structure helps to absorb vertical impacts, helping to protect your spine if the car lands heavily after leaving the road or becoming airborne. It's another example of how we make every part of a Volvo work harder for your safety.

"Balancing performance and efficiency, every Volvo powertrain gives you on-demand power with low fuel consumption and emissions."

DRIVE-E

Enjoying more, using less.

With the perfect balance between performance and efficiency, every Volvo engine gives you on-demand power with low fuel consumption. We achieve this with Drive-E, the cutting-edge technology behind our advanced diesel engine, where performance and efficiency are built in.

Smaller engine loses less energy through friction so they can make every drop of fuel work harder to minimise emissions. We've used low-friction components to make them run smoother and more efficiently. Reducing size and weight has freed up interior space and improved the car's handling.

Precise manual transmission and our

eight-speed Geartronic™ automatic gearbox make the most of each engine's potential. Designed to minimise power loss and maximise performance, Geartronic™ will always select the right gear for whatever is coming next, or you can choose to change gear yourself in manual mode.

To help you drive more efficiently, select Eco mode and the S90 recalibrates the drivetrain for the lowest possible fuel consumption and emissions. The coast function disconnects the engine from the automatic transmission when you release the accelerator at speeds above 65km/h so it isn't being used to slow the car.

Our diesel engine is quiet and smooth for a relaxing journey, thanks to ground-breaking i-ART injection technology. By precisely metering exactly the right amount of fuel for each cylinder, i-ART helps the engine run more smoothly while using less fuel. And the technology ensures it stays that way for the car's lifetime. You will always benefit from low fuel consumption.

At Volvo Cars, by looking to the future we enhance your life today. Drive-E brings together advanced technologies to create a better world and a better drive for you.

Driven to perfection.

We designed the S90 from the ground up for precision and comfort. That's why the sophisticated suspension gives you the best of both worlds. Accuracy and precision when you want it, backed up by comfort and technology to make every drive enjoyable.

Double wishbone front suspension works in harmony with integral axle rear suspension to give you precise control over the car. The rear air suspension compensates for loads, while adapting to the road and driving conditions for an even

better ride. Advanced driver aids such as stability control and understeer control logic keep the S90 stable, improving the way it handles corners. As an option, you can choose between four drive modes that allow you to tailor the car's behaviour to your mood and find the perfect setting for the road you're on. Altering the engine, gearbox, accelerator and steering response changes the way the car behaves and, with the active chassis with rear air suspension, how it rides and handles.

Discover superior comfort and handling with rear air suspension. It soaks up poor road surfaces and keeps the ride height constant so the car responds how you want it to. Active chassis technology allows you to change the way the S90 rides and handles.

Enjoy the performance.

At the heart of the S90 is a range of powerful, refined and advanced diesel powertrain that gives you a great driving experience. All use Volvo Cars' Drive-E technology to

maximise power and minimise emissions, and every engine offers the performance of a larger engine with the efficiency of a four-cylinder.

The sophisticated diesel powertrain with its efficiency and refinement of the 190hp makes it the perfect choice for the business user.

FREEDOM OF CHOICE, YOUR CHOICE.

In a Volvo, you can enjoy the finer aspects of freedom. Such as the freedom to explore new roads, the freedom to enjoy the experience and – not least – the freedom to enhance your car that matches your style

and personality. Choosing a Volvo is more than a statement of your personality. It's about knowing what's most important in life and going in that direction. To show a greater care for people and the world we share, and

never compromise with design and quality. To choose a car that's more human-centric, more intuitive and more efficient – simply much of what empowers you to live a rich, authentic life.

Volvo S90 Inscription

A HIGHER GRADE OF LUXURY.

We created the exclusive S90 Inscription to meet your highest expectations on Scandinavian luxury. It's a highly personal expression that evokes a strong sense of elegant refinement. Each detail is carefully selected to give you and your passengers

a sophisticated and invigorating experience. Distinguished exterior design cues enhance the luxurious look and feel of the S90, while the meticulously crafted interior gives you ample room for a relaxed driving experience. The S90 Inscription epitomizes our proud

heritage of human-centric design. And when it comes to intelligent luxury imbued with distinctive style and fresh thinking, the S90 Inscription is in a class of its own – just like you.

Graphical Head-up display

Apple car play

Park assist camera, rear

Drive modes with Air suspension in rear

Power seat cushion extensions

Power-operated multi-directional lumbar support

The highly sophisticated S90 Inscription expresses the essence of contemporary luxury. Instantly recognisable thanks to its distinctive chrome-finish grille and lower door bright deco moulding, this expression sets the S90 apart thanks to a number of well-judged exterior design cues that correspond with the car's timeless Scandinavian design. Just like beautifully crafted pieces of jewellery design, the ten-spoke Silver/Diamond Cut wheels harmonize perfectly with the metal finish of the bright deco body inlays. Together with the elegant dual integrated tailpipes, the wheels

also contribute to the car's confident stance. Our signature full-LED active high beam illumination technology contributes to both a strong visual identity and excellent vision in the dark.

Every time you open the door, the Inscription tread plates provide an illuminated welcome. The luxurious theme continues with authentic, finely crafted materials that create a lounge-like atmosphere of sumptuous well-being. You and your passengers can lean back in sculpted power-operated Comfort seats with Fine Nappa leather upholstery.

Exclusive Linear Walnut genuine wooden decor inlays, Inscription textile mats and our most advanced ambience interior illumination add to the rewarding Inscription experience. And for you as driver, the large 12-inch driver display and convenient drive mode settings in the console between the front seats add to your feeling of being in command.

The four-zone climate control allows both the driver and the front seat passenger as well as the outer rear seat passengers to set their individual cabin temperature.

1. Small details make Inscription, such as the high gloss chrome frames around the door handles. **2.** Inscription front grille in elegant chrome finish and the signature headlights with full-LED active high beam illumination. **3.** The power-operated Comfort seats with Fine Nappa Leather upholstery and the exclusive Linear Walnut genuine wood decor inlays add to the sensory experience of contemporary luxury. **4.** The lower door bright deco moulding with Inscription logotype. **5.** The intuitive 12-inch driver display with four graphic modes and the 9-inch centre display with touch screen puts you in the centre of action. **6.** Dual integrated tailpipes and bright deco trim add to an elegant and powerful impression. **7.** Drive mode scroll wheel in diamond patterned metal finish and the Linear Walnut decor inlay. **8.** The exclusive Inscription leather-clad remote key fob is in the same colour as the Fine Nappa Leather upholstery in your S90 Inscription – an excellent example of thoughtful Scandinavian craftsmanship and clean design.

The S90 Inscription exterior with its subtle jewellery touches is a timeless expression of classical Scandinavian design. The exterior colour palette allows you to create the S90 Inscription that best reflects your style and preferences. Available in distinctive diamond cut design, the 18-inch wheels connect visually with the exterior design cues to create a harmonic impression of contemporary elegance.

Your S90, your way.

Make the S90 your own with Volvo styling accessories; the perfect addition to your new car. Choose the exterior styling package with chrome inserts for an even more elegant look. Or select individual components as accessories.

Designed to perfectly complement the S90, the exterior styling package with chrome inserts allows you to create an exclusive, individual look.

The front spoiler lip, which runs along the bottom of the bumper, adds definition to the front end, while the chrome insert highlights the car's width. A boot lid spoiler* makes the

S90 look even more dynamic when viewed from the rear or side, and there are sill mouldings that emphasise the car's sporty, low-slung profile.

The 21-inch 10-Spoke Turbine wheels* combine delicate design with a high-tech diamond cut finish for even greater elegance and a more powerful visual statement.

Express yourself.

Enhance the dynamic looks of the S90 and express your individuality by choosing our exterior styling package with body-coloured inserts. Or select individual components as accessories.

Choose our exterior styling package with body-coloured inserts for a powerful

presence, and to emphasise the sense of sporty luxury. A front spoiler and sculpted side sill mouldings accentuate the car's low stance, while a boot lid spoiler* and integrated twin tailpipes hint at the potential performance. Integrated twin tailpipes* and a body-coloured rear diffuser create an even more purposeful appearance.

The 21-inch 5-Spoke Fan wheels* that are available as an accessory are the ideal companion. Bold and contemporary, with an overtly sporty character, they give the S90 even more presence, whether it's moving or standing still.

9. iPad® holder, rear seat

1. Plastic mat, cargo compartment 2. Textile mat with load protection, cargo compartment 3. Floor mats, textile 4. Personalised remote key fob, Linear Walnut 5. Sunshades 6. Child seat, booster cushion 7. Child seat, rearward facing 8. Child seat, infant seat

Designed for your life.

Create an S90 that's perfect for your life, with Volvo accessories that are designed around you and your car.

The sleek iPad® holder complements the contemporary Scandinavian interior. It allows rear-seat passengers to watch, read or play in comfort, and has two USB ports for charging devices simultaneously.

Discreet, slim sunshades provide protection from heat and glare and are integrated into the elegant cabin, retracting neatly when not needed.

The remote key fob can be personalised to match, or contrast, your car's interior trim, with different exterior casings. Choose from a selection of leather finishes (including

white), carbon fibre look* or you can opt for the same wood finishes available in the cabin: Linear Walnut.

It's natural that our new generation of child seats not only look great, with materials that complement the car's interior, but also represents the very best in state-of-the-art safety. Wooltextile, our new child seat upholstery, is 80% real wool, so it's comfortable in warm or cool conditions and has an authentic sense of luxury. And because we apply the same stringent standards to developing child seats as we do to building our cars, you know your children are well protected.

1. Roof box 2. Load carriers 3. Bootlid spoiler

4. Mud flaps, front 5. Semi-electrical towbar.

Exterior accessories.

Make the S90 work for you with Volvo Cars' range of exterior accessories, designed to look good and work flawlessly. Made from tough, high-quality materials, they're built to withstand the kind of punishment meted out by Sweden's winters.

Take advantage of our range of roof-mounted accessories by adding a pair of tough, low-profile load carriers. Easy to fit (they clip onto the car's prepared mounts), they instantly allow you to fit our load carrier accessories, from the ski rack to the canoe

holder. Our lightweight, good-looking roof box fits straight onto the load carriers, adding 350 litres to the car's carrying capacity. Ideally suited to carrying skis (and capable of carrying up to six pairs) its low weight and Quick-grip mountings make it possible to fit with one hand. Neat touches such as LED lighting in the lid, to help you load in the dark, make the roof box indispensable if you have lots to carry.

A set of Volvo-designed mudflaps deflects road grime and dirt from the car's bodywork

and reduces the effects of spray on following traffic. Made from soft plastic they are tough enough to withstand everyday use and flexible enough to bend, not break.

The electrically folding towbar gives you the ability to tow without the inconvenience of a fixed towbar. Press a button in the boot and the towbar slides out from under the car – all you have to do is lock it into position with one click. Because the electrical socket is integrated into the towbar's neck, the whole assembly is unobtrusive and compact.

The simplest way to own a car.

We love it when you're happy. When things are easier than you expect, or go faster and become better. Because when you buy a Volvo, you buy the simplest way to have a car. Financing, insurance, servicing, changing tyres, cleaning – those aspects of car ownership that you might not find very interesting, are the ones that we love to make easier and better for you. That's why your

Volvo Car dealer will always offer you a whole range of simplifying services and offers all designed around you, giving you the most carefree ownership experience possible.

Still, this is just the beginning. Through our uniquely Swedish approach to innovation, we continuously find new ways to make your life simpler. For instance, the Connected Service Booking function, which lets you book an

appointment just by pushing a button in your car. Or the new way of working in teams – like in a racing pit-stop – that is gradually being introduced in Volvo Car workshops all over the world. We call it Volvo Personal Service and it will make your workshop visits much shorter and more convenient. In the future, servicing your car will be so much simpler.
